Student Events:

Yesterday a group of approximately 40 students in grades 4-12 and teachers came together for our 1st Wellbeing Retreat. Using student survey data, student voice and opinions, the students were able to identify several areas with short term and long-term actions on how to improve the AMPS community for all. The categories up for discussion included: School Environment, Student Behavior, Student External Learning Opportunities, Scheduling and Course Options, Celebrations and Assemblies, and student agency and collaboration options across the school. Kudos to the students for their all-day commitment to leading change for the Wellbeing of AMPS!

Have a wonderful day! ~ The AMPS Leadership Team
