

DEAR PARENTS

We would like to inform you that the academic year officially continues until 03/07/2026. Accordingly, the educational process will continue during this period in line with the school's approved plan.

We also confirm that the daily teaching and learning process will continue as normal, with the school providing ongoing academic revision sessions, in addition to the continuation of regular lessons to ensure the required academic benefit for students. Furthermore, educational activities and supportive programs will be implemented to enhance students' academic skills and to make the best use of the remaining school time, ensuring optimal academic achievement until the end of the academic year.

AWARENESS GUIDE

As part of our commitment to supporting the wellbeing, safety, and healthy development of our students, we are pleased to share with you the attached awareness guide titled **“Let's Talk About Addiction.”**

This guide has been developed to help raise parents' awareness about the risks and impact of addiction and to support families in encouraging healthy, responsible, and positive choices among children and young people.

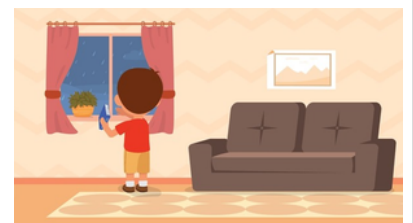

The guide includes valuable information on:

- The definition and types of addiction
- Common causes and warning signs
- The effects of addiction on individuals and families
- Prevention strategies and ways parents can support their children

We kindly encourage all parents to review the guide and discuss its key messages with their children to help promote awareness and informed decision-making.

SAFEGUARDING TIPS:

Don't leave children home alone until they can be responsible.

Infants and young children need full-time care and supervision. With older kids, it's a matter of maturity and preparation. Can your child follow rules such as stay inside, no cooking, and don't open the door to strangers? Have you role played what to do in case of fire, injury, or other emergency? Is there a safe place to go (such as next door), if necessary? Does your child know how to contact you? A rebellious teen may need more supervision than a responsible 11-year-old. Use your own good judgment. Prepare your child, start with short periods alone, and monitor results.
