# HEALTH AND SAFETY MANUAL

## SECTION 1 – GENERAL INTRODUCTION

### 1.1 Purpose

We believe that there is an imminent need to document all crisis procedures and ensure that all staff, students, and parents are aware of what should take place following any single crisis that the school may face in the future. It is also time-consuming to reinvent the wheel every time a crisis takes place.

Crisis management involves prevention, preparation, intervention, and post-tension. This manual will serve by providing a framework, useful guiding principles, policies, and a recommended course of action to assist school staff, students, parents, and the surrounding community to act quickly and responsibly in a crisis to minimize negative consequences. The manual shall be revisited, on a need-by-need basis, by the Crisis Management Team (CMT). (See Appendix 1)

Each crisis is different, and schools react to crises in a unique way. It mostly depends on the makeup of the staff, students, parents and surrounding community. In this proposed manual, the team laid down the framework and attempted to explain the kind of procedures that need to be in place. The purpose of this manual is to hand it over to a crisis management committee to evaluate and make all necessary amendments. The aim of which by the end of this academic year we would have our own school crisis management manual.

### 1.2 Goals

- To develop an effective crisis management and security plan that will ensure the safety and welfare of students and school staff, protect school property, and regulate the operation of the school during a crisis incident and/or medical emergency.
- Ensure that school-designated staff members and students are on standby to take appropriate actions in response to different kinds of crises in a consistent manner.
- Provide parents and community stakeholders with the policies, guidelines, and procedures that should be followed during an emergency.
- Reduce emotional trauma, assist emotional recovery from trauma, minimize personal injury and damage to property and cooperate with local emergency agencies.

## 1.3 Health and Safety Policy

### 1. PURPOSE

- 1.1 **MAS** acknowledges and accepts that the health, safety and welfare of all students, staff, parents, and service providers are of paramount importance to our educational sector. Delivering best class health and safety standards at **MAS**, the organization has developed an effective and compliant health and safety management system.
- 1.2 The health and safety policy will be communicated to all **MAS** staff and will be available for any other relevant stakeholders.
- 1.3 The following health and safety policy defines **MAS** ' commitment to achieving health and safety excellence.

### 2. SCOPE

- 2.1 The scope of the policy covers **MAS** and their subsequent employees, students, parents, and service providers.

### 3. POLICY OBJECTIVES

- 3.1 To ensure the company's commitment to health and safety.
- 3.2 To ensure it is practicable, for the health, safety and welfare of all employees, students, parents, contractors, and people visiting our premises.
- 3.3 To reduce the total number of accidents and ensure the prevention of injury and ill health for all employees, students, parents' contractors, and people visiting our premises.
- 3.4 To protect the company from any potential legal Claims.
- 3.5 Ensure compliance with both local laws and relevant legislation and industry best practice.

#### **4. TO MEET THE OBJECTIVE MANAGEMENT WILL**

- 4.1 Establish a health and safety culture that is prominent throughout **MAS**.
- 4.2 Ensure the company's commitment to health and safety is driven by top level management.
- 4.3 Empower employees by providing suitable information, instructions, and training to allow them to perform their roles safely.
- 4.4 Ensures the health and safety management system is continually improved.
- 4.5 Ensures health and safety performance is continually monitored and improved upon.
- 4.6 Implement and maintain a procedure for on-going hazard identification, risk assessment and the determination of necessary hierarchical controls.
- 4.7 Communicate and consult with employees and stakeholders on health and safety matters.
- 4.8 Ensures measurable health & safety related KPI's are established and continuously monitored.

#### **5. RESPONSIBILITY**

- 5.1 Ultimate responsibility for health and safety rests on the **MAS** Board.
- 5.2 The **MAS** Board has a responsibility for allocating adequate operational resources and finances to support the organization's commitment to continuous safety improvement.
- 5.3 Director & Director of Operations have a specific responsibility for ensuring the

implementation of the health and safety policy into the school.

- 5.4 Director & Director of Operations have a responsibility to ensure suitable emergency exercises are carried out at regular intervals throughout the year. The frequency of the exercises must comply with **MAS** emergency procedures and local legislation.
- 5.5 The Health and Safety Officer (HSO) are responsible for establishing and monitoring the health and safety strategy for **MAS**.
- 5.6 The Health and Safety Officer (HSO) are responsible for providing timely health and safety support and guidance to all relevant persons.
- 5.7 The Director of Operations has a responsibility for ensuring suitable workplace health, safety and fire inspections are conducted at regular intervals. Issues identified during such inspections are given corrective action in a timely manner.
- 5.8 The Director of Operations is responsible for ensuring the on-going maintenance and monitoring of fire and life safety systems is carried out in line with **MAS** procedures.
- 5.9 All employees have the responsibility to protect their own health, safety, and well-being and that of those who may be affected by their acts or omissions.
- 5.10 All contractors and service providers are responsible for ensuring that they comply with **MAS** health and safety policies and procedures. Moreover, they are responsible for monitoring their own health and safety performance and that of their employees and sub-contractors.
- 5.11 Further specific responsibilities are defined within the health and safety responsibilities section of the health and safety manual.

## 6. Emergency Training and Personnel

Al Maaref American School in Dubai has an emergency response team and offers emergency response training opportunities. Ensuring the safety and well-being of students and staff is of utmost importance. Having a medical emergencies response team and crisis management training in place. Additionally, we have a certified medical professional who is our School Doctor, (Dr Samia Salih) on-site during normal business. This list of on-site medical response team personnel is also located in Emergency Preparedness Plan, pages 11, 12, 13 and 16, which can be found here:

It's important for the school community to be familiar with the Emergency Preparedness Plan and know where to find it, as it contains critical information on how to respond to various emergency situations.

This plan should outline the roles and responsibilities of each member of the emergency response team, the procedures to follow during different types of emergencies, and contact information for relevant authorities.

It's vital to keep the emergency response team and training programs up to date and periodically review and refine the Emergency Preparedness Plan to account for any changes in the school's operations or new risks that may emerge. The safety and well-being of the school's community depend on effective emergency planning and preparedness.

6.1 Below is a list of personnel members at the building and their roles in emergency response.

| EMERGENCY RESPONSE PERSONNEL ROLE | NAME         | LOCATION          | MEDICAL QUALIFICATIONS/SKILLS                                   | CONTACT DETAILS                                 |
|-----------------------------------|--------------|-------------------|-----------------------------------------------------------------|-------------------------------------------------|

## **SECTION 2 – Health and Safety Policy/CRISIS MANAGEMENT**

### **2.1 What is a Crisis?**

A crisis is a time of intense difficulty, trouble, or danger that a school may face. It usually is also the time when a difficult or important decision must be made. Crises disrupt our normal day-to-day functioning. Everyone experiences a crisis now and then. They are a normal part of life and can occur at any stage.

### **2.2 Crisis Management Team (CMT)**

#### **2.2.1 Goals**

The CMT is the most important tool for crisis intervention. The goals of the CMT are to ensure:

1. Safety: for both students and staff.
2. Stability: to regain the stability of the school routine as soon as possible.
3. Consistency: to control information flow to eliminate rumors.
4. Prevention of further injury: to be aware of secondary reactions and to identify at-risk students for necessary intervention.
5. Support to individuals and groups: to provide effective counseling to facilitate adjustment of individuals and groups and to mitigate post-incident delayed reactions.
6. Empowerment of students' response capabilities: to enhance the students' personal growth through effective coping with the crisis.

#### **2.2.2 Functions**

The functions of the CMT are to:

1. Approve the proposed school crisis management plan
2. Collect and clarify ongoing information on the crisis
3. Evaluate the impact of the crisis to the school
4. Coordinate all resources, in and outside school, and respond quickly to the crisis
5. Provide support to teachers, students and parents
6. Coordinate the progress of the crisis management
7. Evaluate the crisis plan
8. Coordinate the follow up work

#### **2.2.3 Composition**

The crisis management team is composed mainly of the following:

1. School Principal
2. Section Principals (SP)
3. Safety officer (SO)
4. Supervisors
5. School Doctor

### **2.3 Checklist: School Crisis Management Team Meeting**

1. Verify and update the details of the crisis.
2. Evaluate the impact of the crisis on the school, the teachers, the students, the parents, and the community.
3. Determine if additional support from community agencies is needed.
4. Develop a strategic crisis plan and arrange the implementation procedure and the division of labor.
  - Hold an initial staff meeting.
  - Make announcements of the crisis (death or tragic incident, etc.) to students.
  - Support students
    - inform students of the event
    - decide the procedure in disseminating the news
    - arrange interview locations
    - arrange classroom presentations, activities
    - arranges individual and group counseling for students.
  - Answer inquiries from parents and outside.
  - In cases of death or tragic incident:
    - Prepare for media inquiries.
    - Handle inquiries from police – arrange for students to be accompanied by parents or staff for interviews.
    - Designate someone to represent the school to the families of the victims.

### **2.4 Communication**

1. Communications to the school community must be provided timely and accurately.
2. Confidentiality of specific individuals will be always maintained.
3. Provide updated facts as soon as they are available to control the narrative within or outside the school.
4. Communication inside the school
  - With staff – mainly Portal/email, SMS, phone tree
  - With students – paradigm/email, through class teachers, SMS to parents.
5. Communication outside the school
  - With parents and community groups – Letters, Digital Campus /email, SMS.
6. Communication with the media

- When the media wants to visit the campus for a story, it is a policy that they get their clearance through the office of the school Principal. The school Principal will determine the reason for their request, the information that will be made available, and how and when the information is disseminated.
- The CMT will designate one member to communicate with all media requests to assure consistency.
- The designee will prepare a written factual account of the incident prior to meeting with any media source.
- Do not offer opinions, guesses, or personal perspectives. It is pertinent to the integrity of the school that all media contact be based on facts only.
- Set limits for time and location. Do interviews standing, in a place with little or no student/parent traffic.
- When handling interviews:
  - Ask for specific questions
  - Do not say “no comment” or “I do not know”. If you need to, tell them you can find out and get back to them, then do so.
  - Be honest.
  - Do not speak “off the record”.
  - Keep answers brief and to the point (no more than 10 seconds per answer). ○ Emphasize the positive action being taken.
  - Do not allow the media to force you to answer a question you are not prepared to answer.
- Obtain staff permission prior to asking them to be interviewed.

## **2.5 Response in the case of Technological emergency (Power loss)**

- Notify emergency personnel such as the fire department, police department, and/or ambulance to the scene
- Shut down and/or secure all non-essential technology equipment and systems
- If applicable, activate the backup generator and/or alternative power sources.
- Restore power or other necessary services as soon as possible.
- Test all equipment and systems for safety to ensure they are in full working order.

## **2.6 Response in the case of Chemical Spill and Explosion**

- Notify emergency personnel such as the fire department, police department, and/or ambulance to the scene
- Shut down and/or secure all non-essential technology equipment and systems.
- Evacuate all personnel in an orderly fashion, following all protocols and procedures already in place.
- Contain the chemical spill or explosion if possible, using any methods available.

- Test all equipment and systems for safety to ensure they are in full working order.

## **SECTION 3 – PREVENTION PLANS FOR CRISES**

### **3.1 Bus Safety and Security**

#### **3.1.1 Bus Personnel**

Each bus has two adults, (except for the high school boys' bus) the bus driver, and the school-appointed assistant. The bus driver is responsible for solely driving the bus. The assistant is responsible for overseeing the safety of the children and ensuring that children are safely dropped off and picked up.

The bus assistant is required to:

- Ensure full awareness of the bus route and stick to the route.
- Keep updated and accurate bus log sheet including the substitute assistant's name.
- Notify the Operation Manager of any incidents or changes that take place (including changes to the bus, route, or driver or accidents etc....).
- Ensure the implementation of transportation changes.
- Ensure that students are safe and not disruptive on the bus.
- During the afternoon, report any missing students to the Operation Manager.
- Ensure that all students are dropped off before getting off the bus.
- If the student is not received by anyone then she must be taken back to school and officials must be informed.
- Ensure that no student is left behind on the bus.

#### **3.1.2 Bus Safety Rules**

##### Rules

The following are the safety rules that must be always followed on bus rides.

- Students must remain seated until the bus has come to a complete halt.
- Windows near children are to remain closed.
- Students are not allowed to sit on foldable seats.
- The bus driver (via automation) and the matron are solely responsible for opening and closing the bus door.

#### Rules Enforcement

The Head of Resources is responsible for ensuring that all rules are abided by. The consequences of violations of rules by driver or assistant are to be enforced.

### 3.1.3 Bus Maintenance and Quality Control

#### Standards

There are specific standards that buses should always meet. The following is a list of such standards that need to be always functioning:

- Automated doors
- Air conditions
- Effective brakes
- Full tank (gas, diesel or petrol) during bus routes
- Seat belts
- Good space between seat rows

#### Maintenance

The Transportation supervisor oversees the process for the maintenance of the school buses and ensures that buses perform regular required maintenance.

### 3.1.4 Communication

All bus assistants have school mobile phones. They are used at times when there is a diversion in the route or the need to call parents.

## **3.2 Campus safety and security**

### 3.2.1 Security Team

#### School Personnel

The following are the staff members who are involved in the security process:

- Safety officer and Operation Manager – main person for any major security issue

All security personnel are supervised by the Safety Officer and Operation Manager.

### 3.2.2 Campus Safety

#### School Entrances and Exits

The school has four official gates, all of which are guarded by security personnel. Gate No. 1, 3 & 4 are for own transport students and Gate No. 2 is only for School Bus students. Gate No. 1, 3 & 4 are open for faculty and students' entrance until 7:45 am. After that time, the gates are closed and only Gate no. 1 opens upon request and operates for usual visitors entering the school premises.

#### Indoor Facilities

The Maintenance personnel oversee the regular maintenance and facility safety of all indoor facilities. When maintenance rounds are made, a checklist of items will be provided by the department.

### **3.3 Off Campus Trips (day trips) – Risk and Safety Assessment**

#### **3.3.1 Trip Chaperones**

##### Adult to Student Ratio

For Kindergarten to Grade 12, the adult-to-student ratio is 1:20. As per the MOE regulation. Additional adults including nurses and assistants with kindergarten to Grade 2 trips.

##### Medical Aid

A medical First Aid kit is available for all trips off campus.

##### Legal Liabilities

All students participating in trips, camps or events off campus are to hand in a form signed by the parents specifically related to this trip or event. A student whose form has not been signed and returned may not be allowed off campus under any circumstance.

#### **3.3.2 Field Trip Emergency Team**

For any emergencies during off campus trips, the activities coordinator is the main source of contact.

## **SECTION 4 – PREPARING FOR CRISIS: OVERVIEW OF ESSENTIAL ACTIVITIES**

### **4.1 Annual Training on Crisis Management Procedures and Drill requirements**

#### **4.1.1 Introduce the Crisis Management Manual**

At the beginning of the school year, before students start school, a general staff meeting will be conducted, and the Crisis Management Manual will be distributed and discussed with all employees and the CMT is introduced for them to know who to turn to. The manual's importance will be discussed and a quick outlining of the crises referred to in the manual will be outlined.

#### **4.1.2 Drills**

- Evacuation drills will be conducted within the first few weeks of school (5 times a year) one of them is official with the Dubai Civil Defense (DCD).
- Drop and cover earthquake drills will be conducted at least once a year.
- Fire Safety training and CPR/First Aid training will be available for staff to enroll in. Commitment will be established as a percentage of civil defense

### **4.3 Medical Support**

#### **4.3.1 Medical Supplies**

- Each Building has access to a basic first aid kit (supplied by the school doctor)
- Every bus will be equipped with a basic first aid kit.

#### **4.3.2 Faculty and Community Support**

- A list of staff names and numbers who can help in a medical crisis is located at the following location (see appendix 3 for a complete list):
  - Clinics
  - Assistant Principal's Office
  - Head Principal Office
- A list of nearby hospitals and types of medical situations is also available (appendix 3).

#### **4.3.3 Fire Safety & CPR/First Aid Training**

- The school will offer annual certification classes to staff members who are willing to attend the training.
- A list of trained staff members is also available (appendix 3).

#### 4.4. After School Hours Supervision

##### 4.4.1 Administrators on Duty.

- School Principals are available on campus from 1:00 pm to 3:20 pm.

##### 4.4.2 Security on Duty

- Security personnel are responsible for dealing with crises after 3:20 pm on campus.
- In case of crisis, inform the Operation Manager.

### Section 5 – Campus Security and Closure Procedures

#### 5.1 Stages of Alert

##### 5.1.1 Chain of Command

Describes the reaction of school personnel to different crisis levels.

The Crisis Management Team (CMT) will convene to decide the need for action. The Head of the CMT will have the authority to make all immediate and required emergency calls. For any major school disruptions that do not require on-the-minute action, the CMT will call an immediate emergency meeting to make decisions. For long-term school closure and evacuation.

##### 5.1.2 Flowchart for Activation of CMT

### 5.1.3 Short-Term Campus Closure

- If an immediate, specific, and persistent danger is identified, the CMT may decide to lock down the campus for a specified period.
- School communicates with parents and staff through paradigm and SMS.

## 5.2 Immediate Response

### 5.2.1 Controlled Release Option from School

- If issues arise that require student release from school to parents or guardians, the school will inform parents through SMS or phone calls.
- Buses will run only for students.
- All staff stay at school until the last student leaves.
- In case phone calls are made, the offices will follow an issued script.
- All appropriate non-teaching staff will work with emergency responders to provide traffic and crowd control.
- Parents will enter the school premises and collect their children from their class.
- High School students will be allowed independent release if a verified phone call is received from the parent/guardian approving it. Only designated school staff will be allowed to report these phone calls.
- Under crisis – release could be with a family friend etc....

## **SECTION 6 – DEALING WITH SPECIFIC TYPES OF CRISES**

### **6.1 Evacuation Drills**

#### **6.1.1 Fire**

1. Once you hear the alarm, you will ask your students to leave everything as is and to line up quietly and orderly.
2. You will take the evacuation folder with you while accompanying your students out to the assembly point.
3. You must make sure that no student is left behind.
4. Turn off the lights and the AC.
5. Walk quickly yet quietly with your students till you reach the assembly point.
6. Once you reach the assembly point, you must count your students, check the name list and if you have all your students with you, you will raise the name of your class with the green card.
7. In case you have any missing students, you raise your class name along with the red card.
8. You stay with your students in line till you hear a sign that allows you to go back to your classes safely.
9. While walking back to your class, you need to assure that your students are walking in one line and quietly
10. The evacuation process should take no more than 3 minutes.

#### **6.1.2 Drop and Cover – Earthquakes**

Goal – Earthquakes can never be anticipated. Earthquake drills will take place once a semester to train staff and students to react immediately and wisely with minimal panic related to the tremors.

- The siren to announce drill would be the normal class bell (continuous for 30 sec).
- Drop down on the floor and avoid wide expanses of roofs.
- Take cover under a sturdy desk, table, or other furniture. If that is not possible, seek cover against an interior wall and protect your head and neck with your arms or a book. Avoid danger spots near windows, hanging objects, mirrors, or tall furniture.

- If you take cover under a sturdy piece of furniture, hold on to it and be prepared to move with it if you need to. Hold the position until the ground stops shaking.
- When shaking has stopped, immediately look around and evaluate danger. Check to see if any students are injured. If they have any slight injuries, ask a responsible student or staff member to assist them while evacuating. Non-ambulatory injuries should be assured and wait for treatment where they are. Notify a member of the CMT.
- Start evacuating your class using the route on your evacuation map. Everyone stays together and quietly evacuates.
- Check the exit routes are clear. Move directly away from the building when exiting. Students should cover their heads with a book or a bag. DO NOT USE ELEVATORS.
- Train students that tremors may follow and these are minor shifting. There is no need to panic over secondary tremors.

## **AMPS FIRE DRILL / LOCK-DOWN PROCEDURE AND POLICY**

### **If a Fire is discovered:**

- a) Immediately sound the fire alarm. It is automatically synchronized with a Fire Alarm system which is controlled and monitored by the local Civil Defense Authority.
- b) Do NOT attempt to fight the fire if you will be putting yourself or others at risk.
- c) The DCD department will be coordinating all required support from all other departments and rush to the school location.
- d) During that time, the school will be following the Fire Drill procedures, and all buildings will be evacuated.

**SIGNAL:** FIRE ALARM BELLS RING IN A CONTINUOUS CYCLE.

All school personnel are to participate in the Fire Drill.

Parents, guests and community people on the grounds during a drill must participate.

**PROCEDURE:**

1. When the fire alarm is given, the teacher will give the warning for Fire Drill. All lessons and activity should cease, machinery should be shut down, gas-and-oil burning apparatus and appliances should be shut off, and The students should remain still and quiet to await further orders.
2. The teacher will give the command: STAND. Students should stand and remain silent. The section Supervisor will pass out the **Emergency Attendance File (EAF)** at the assembly points. Teachers will take the class register and keep possession of it until the end of the drill.
3. **Teachers:**
  - a) Check that all students are out of the classroom.
  - b) Close classroom door. DO NOT LOCK (if the teachers have the room key, like science or ICT labs, later entry may be required.)
  - c) Take the class EMERGENCY ATTENDANCE FILE (EAF) from section Supervisor.
4. The teacher will open the classroom door, determine the route to be taken, and give the command: MARCH. The teacher will then supervise the class outside of the building in an orderly manner, to fire assembly point. Students will remain in formation until dismissed by the Assistant Principals.
5. Students outside the classroom and still in the building should go to the nearest hallway and join any class or, if close to an exit, should leave the building and report to their class in the assembly point.

**PROCEDURE DURING P.E.:**

Teacher, or supervising adult, stops play, organizes class(es) into silent and orderly lines and conducts class(es) to assembly area.

**PROCEDURE WHEN NOT IN YOUR OWN CLASSROOM:**

- a) Teachers should be familiar with assembly area and evacuation route designated for that classroom or area.

- b) The EAF should be given to and used by the teacher, substituting teacher, or supervising adult to account for all students.
- 6. Once assembled at the assembly area, the teacher will check the names and the number of students according to the EAF. If there are any missing or additional students (those who have been outside their original classes and joined another class to the assembly point). After checking the attendance, teachers then will RAISE:

**GREEN CARD, if all present. RED CARD, if a student is missing, or there is an extra student or any other problem.**

- 7. If a RED CARD is raised, SP or a supervisor will attend the class with the RED CARD to get necessary information about the missing student, SP or the supervisor will inform the Safety Officer who will be informing the patrolling security personnel to find the missing student(s).
- 8. After getting the required information from the Homeroom teachers, APs then start

**WAVING:**

- a. **WHITE FLAG, if the inside is clear.**
- b. **RED FLAG, if there is still someone inside the building.**
- 9. The security personnel go and check for the final clearance.
- 10. The Safety Officer remains in the main Assembly Point monitoring and controlling the situation, always alert over his radio transmitter for any message from the patrolling security personnel.
- 11. After checking their respective areas, the security personnel report over the radio transmitter to the head guard, who then starts WAVING. Safety Officer
  - a. WHITE FLAG, if the inside is clear.
  - b. RED FLAG, if there is still someone inside the building.
- 12. Principal will make every effort to ensure that no students remain in the school building.

13. The principal will announce the Fire Drill is completed. Students are to be escorted by their teachers to their classrooms.

**PROCEDURES FOR ADMIN PERSONNEL, PARENTS, AND GUESTS:**

1. Clear evacuation routes are displayed in the admin area.
  - a. Once they hear the Fire Alarm, admin staff members, will STOP whatever they are doing, and announce CLEARLY to their guest/ parent "FIRE DRILL", and ask them to join him/ her in the evacuation of the  
building to the assembly point.
  - b. The admin team, guests, and parents will gather in their designated area in the assembly point, waiting for  
the principal's announcement.

**If a LOCK-DOWN is discovered:**

- 1) Member announces through the Megaphone and makes this announcement: **"This is a lockdown"** Terminology to communicate the type of lock-down:
  - **"Lockdown"** should only be used when there is a major incident or threat of school violence within the school, or in relation to the school.
  - **"Hold and Secure"** should be used when it is desirable to secure the school due to an on-going situation outside and not related to the school (e.g., a bank robbery occurs near a school but not on school property).
  - **"Shelter in Place"** should be used for an environmental or weather-related situation
- 2) Open classroom doors and quickly secure all children who are in the hallway, bathroom or general vicinity.
- 3) Lock classroom doors from the inside and turn off all lights. Blinds are drawn, PC monitors switched off, mobile phones vibrating. Tip tables over and encourage children to hide behind the tables in a brace position.

- 4) Have your red/green emergency folder in hand. Children should not be close to windows, if possible. Children and adults should remain silent.
- 5) Take attendance to ensure that all children in your class are present. Note names of children you may have brought into your class at the lockdown announcement. Check any adjoining rooms for children's attendance and note the names of those who are unaccounted for in the room. (Although staff cannot leave, keeping a record of who is **present with YOU** is critical in an emergency).
- 6) Do not open the door for anyone regardless of what you hear going on outside. If someone knocks at the door, do not respond. An administrator may be under threat and be forced to ask you to open the door. Do Not Open.
- 7) Be prepared to follow further instructions from the Head of Setting/Deputy or Designee.
- 8) NEVER open the door or leave the classroom until the clear alert sounds...
- 9) If children are unable to get into the building, they are to lay flat on the ground behind objects or trees. Children should not run, but remain face down, flat on the ground.

#### **Crisis Reporting Procedures:**

Only the following personnel are authorized to report a crisis to local authorities:

- a. School Director, if unable
- b. Safety Officer, if unable then
- c. Operational Vice Principal

This plan should be shared only with administrative personnel and staff employees.

#### **Lockdown Checklist:**

P or VP will:

- 1) Determine if there is a need for a campus lockdown and if so, make the "all-call" announcement or sound warning siren.
- 2) Alert office staff 3) Call local authorities.
- 4) Call Fire Department
- 5) Notify the Corporate Office
- 6) Lock administration office doors and restrooms.
- 7) Alert the Safety Officer, housekeeping, security guard and teachers outside the buildings. Instruct them to enter a building at the closest location.
- 8) Wait 1 minute. Begin cell phone contact check with building principals and Safety Officer.

**Administration Office Team:**

- 1) Assist by locking the main doors on the ground floor.
- 2) Check that building security guards are doing the same.

**Section Principal's Script for "Call**

**Chain":** ASK the person who answers:

- a. Are all of your class students accounted for? Is anyone missing?
- b. Is there anyone in your room who is not on your class list? What are their names?
- c. Do you have an adjoining room? Are all of the students in that room accounted for?

Document all information given to you from the classrooms you have contacted.

When all the call chains have been completed, report to the School Director.

**6.7 Bus Accidents**

Goal – Secure staff and students on the scene of local and/or vehicle collisions involving students and/or staff traveling to and from school and during off-site activities such as field trips, sporting events, performing arts events, etc....

1. The bus assistant or driver informs the transportation department. If on a trip the chaperone will inform the Operation Manager.
2. Operation Manager will inform the Section Principal.
3. Section Principal reports to the principal and both:
  - Determine if any students or staff has been injured
  - Determine if they will be transported to hospital
  - Notify parents or guardians
  - Accompany injured staff or student to hospital
  - Provide emotional support to accident victims.
  - Brief parents and guardians.

**6.9 Medical Emergencies**

Goal – To be able to handle and have an immediate response to all possible life-threatening situations arising from health conditions as well as unintentional and intentional injuries.

Examples include but are not limited to accidental death, cardiac arrest, serious illness, drug

overdosage, seizures, severe body injuries, on the playground and on-campus accidents, and serious athletic injuries.

1. Immediately summon help (school doctor, school staff trained to administer specific health care procedures).
2. Notify the Principal and Section Principal
3. Do not move the victim(s), especially if you suspect a head or neck injury unless safety is a concern (fire present, explosive atmosphere, etc...).
4. Assess the victim and if applicable begin CPR.
5. Check the file of the victim for a medical alert.
6. Disperse onlookers and keep others from congregating in the area.
  - If possible, isolate the victim(s)
7. Direct someone e.g. staff or students to meet and guide the first responders.
8. Remain to assist emergency medical personnel.
9. Document all actions taken.

#### **6.10 Accidental Death**

1. Verify information concerning the death of the student or staff and notify Principal. CMT Called for an urgent meeting to assess the situation.
2. CMT to call local authorities (ambulance, police, fire and rescue).
3. Gather information:
  - Student/staff schedule and emergency contact card.
  - Name of student/staff close friends, siblings, and the schools they attend.
  - Names of witnesses, if any.
4. Prepare a formal statement or announcement
  - Provide facts that will reduce rumors.
5. Notify the faculty and staff
  - Preferably in-person during an emergency staff meeting.
6. Make an official announcement.
7. Designate a location for grief counseling.
8. Decide for counselors or administrators to visit selected classes as needed to speak personally to staff members/students.
9. Provide substitute teachers for absent/affected teachers.
10. Adjust the daily schedule to accommodate grief counseling as needed.
11. In case of death, provide funeral/visitation information if affected family has given permission.
12. Procure personal items of the deceased from classrooms.

## **SECTION 7 – POST INCIDENT RECOVERY**

### **7.1 Maintain Recovery Goals**

- Restoring the learning environment.
- Assuring the wellbeing of the community concerned with the crisis.
- Ensuring the school image is intact and not disrupted for any reason.
- Securing all loose ends and having the situation under control.

### **7.2 Establish Top Level Legal and Insurance Advice**

- Assess the size of the catastrophe and any physical implications/damages.
- Contact the insurance company and pursue legal actions if needed in response to the accident/crisis.

### **7.3 Brief School Community and Media (if needed) of the Exact Happenings and Aftermath**

- Identify a spokesman/representative to address the school community and media.
- Honest, truthful, and sincere remarks are the safest way to avoid complications and double meanings.
- The language used and timing of the message are both crucial to reflect the school's integrity and its community trust.
- An identified person in the CMT should collect all media coverings for assessment and filing.

### **7.4 Management of a Service Hosted by the School – Memorial and/or Funeral**

- Assure all legal paperwork is taken care of (death certificates, police reports, hospital reports, etc....).
- CMT decision on the venue of the ceremony (on a school campus or other venue).
- Contact the deceased family representative to set details.
- Announce venue, date, and time to the community (classmates, staff members, and family members). Attach a letter of condolences and advice on how to reach help and counseling.
- Arrange event logistics (speech, flowers, memory wall, and transportation to mosque/cemetery).
- Two minutes of silence in memory of the deceased on the first day back to school.
- Brainstorm ideas to honor the person (book or charity donations in their name etc...).
- Handouts of encouragement and support are given out to those who need them.

## **Appendix 1 – Crisis Management Team**

| <b>Building / Department</b> | <b>Contact Person</b>      |
|------------------------------|----------------------------|
| CEO/ Director                | Mr. Mohamed Motawea        |
| School Principal             |                            |
| Director of Operation        | Mr. Syed Muhammad Mudassir |
| Health & Safety Officer      | Mr. Colin Osagie           |
| KG Principal                 | Ms. Maydy Farag            |
| Elementary Principal         | Ms. Heba Taja              |
| Secondary Principal          | Ms. Dima Al Zuhair         |
| School Doctor                | Dr. Samia Salih            |

Persons who may be called upon to join the CMT (depending on crisis type):

| <b>Building / Department</b>            | <b>Contact Person</b> | <b>Mobile Number</b> |
|-----------------------------------------|-----------------------|----------------------|
| Principal Assistant ( KG)               | Manal Ajzmi           | 052-614-2711         |
| Principal Assistant (Grade 1 – 5)       | Sireen Farok          | 052-641-2688         |
| Section Supervisor (Grade 1 – 3)        | Younes Najar          | 052-641-2694         |
| Section Supervisor (Grade 4 &5)         | Mohammad Mansoor      | 052-641-2712         |
| Principal Assistant (Grade 6 – 12 Boys) | Mostafa Elfaham       | 056-632-4045         |
| Section Supervisor (Grade 6-8 Girls)    | Noha Elsharkawi       | 0522-759-2542        |
| Section Supervisor (Grade 9-12 Boys)    | Mohamed Desouki       | 052-509-6736         |
| Section Supervisor (Grade 9-12 Girls)   | Radwa Ghanim          | 052-885-8731         |

|              |              |              |
|--------------|--------------|--------------|
| School Nurse | Reem Ahmed   | 055-288-2653 |
| School Nurse | Jeena Jacobs | 055-647-7459 |

## APPENDIX 2 – MEDICAL EMERGENCIES ON CAMPUS

### Minor medical emergencies:

These are not life-threatening and can be treated by the school doctor or at home under the supervision of the student's doctor. This type of emergency does not require early dismissal of the student, and shelf medication can be given to the student by the school doctor. In some conditions, the student may be allowed to go home accompanied by his parent or guardian. The school doctor fills in the necessary clinic form to serve as parent notification.

**Moderate medical emergencies:** (Most students who need to be transported to the hospital belong to this category).

These are not life-threatening emergencies, but they cannot be treated on campus. The patient must consult a specialist within hours, meaning that the student can wait until the parent or the guardian arrives to accompany the student to the specialist. The school doctor will apply the first aid management and take care of the student during this time.

We can ask the parent whether he prefers to take the student by himself to the specialist or to let a school designated administrator accompany the student to the nearest hospital.

### Major medical emergencies:

These are life threatening emergencies, and the student must be taken to the hospital immediately. Here, we cannot wait for the permission of the parents. We start acting; the school doctor applies the first aid measures, an administrator (as per emergency action chart below) calls an ambulance then notifies the parent.

According to *the American Academy of Pediatrics*, school medical emergencies are:

| S. No. | Major emergencies                                                                                | Moderate emergencies                                                                                                                      | Minor emergencies                                   |
|--------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| 1      | Child is unconscious                                                                             | Heat stroke                                                                                                                               | Sore throat                                         |
| 2      | Blocked airway                                                                                   | Cut wounds needing stitches                                                                                                               | Headache                                            |
| 3      | Absent pulse                                                                                     | Gastroenteritis                                                                                                                           | Abdominal pain                                      |
| 4      | Uncontrolled bleeding                                                                            | Simple wounds                                                                                                                             | Minor trauma and sprain                             |
| 5      | Poisoning                                                                                        | Second degree burn                                                                                                                        | Minor trauma and sprain                             |
| 6      | Seizures > 5 min. or for the first time                                                          | Palpitations (awareness of heart beats)                                                                                                   | Common cold                                         |
| 7      | Anaphylaxis                                                                                      | Some minor complaints in special cases                                                                                                    | Mild pain                                           |
| 8      | Diabetic comas                                                                                   | Any minor problem not responding to shelf medication                                                                                      | Stomach ache                                        |
| 9      | Complications of special cases                                                                   | Head trauma followed by vomiting, loss of consciousness or bleeding                                                                       | Dizziness and nausea                                |
| 10     | Major head, neck & back injuries (fracture)                                                      | Fractures without shock: e.g.: Ankle, hip and shoulder fracture and injuries.                                                             | Tooth falling                                       |
| 11     | If moving the child will cause further injury                                                    | Contagious diseases e.g.? (e.g. purulent conjunctivitis, H1N1, some skin diseases, chicken pox)                                           | Mild Fever up to 37.9°c                             |
| 12     | Limb and eye threatening conditions: (conditions that will leave the child permanently disabled) | High Fever from 38°c (Meningitis is presented by high fever but it cannot be diagnosed on campus because it needs special investigations) | First degree burn                                   |
| 13     | Shock (e.g.: due to third degree burn, severe diarrhea, anaphylaxis, major trauma, etc....)      | Other (as identified based on school doctor recommendation)                                                                               | Insect bites with minor reaction                    |
| 14     | Not breathing or difficulty breathing (e.g.: CROUP)                                              |                                                                                                                                           | Mild shortness of breath in asthmatic students      |
| 15     | Severe abdominal pain (acute abdomen) (e.g.: Appendicitis مصنار أعرو)                            |                                                                                                                                           | Other (as identified and recommended by the doctor) |
| 16     | Other (as identified based on school doctor recommendation)                                      |                                                                                                                                           |                                                     |

**Emergency Action Chart (for major and moderate) \***

|                                       | <b>Major</b>                          | <b>Moderate</b> |
|---------------------------------------|---------------------------------------|-----------------|
