

DEAR PARENTS

The safety and wellbeing of our students and families remain our highest priority. In light of the latest guidance issued by the relevant authorities, and in our commitment to fully comply with all safety and regulatory requirements, we would like to inform you that online learning will continue throughout next week.

This decision has been made with careful consideration to ensure the continued safety and protection of our entire school community. We remain committed to following all official directives and believe that continuing with online learning at this time is the most appropriate and responsible step.

Please be assured that our teachers will continue to deliver high-quality instruction through our online learning programme, while providing ongoing academic and pastoral support to ensure students' progress and wellbeing.

In addition, and as part of the operational arrangements supporting the transition back to on-site learning, the temporary suspension of school transport services will remain in place during this period, in accordance with the instructions of the relevant authorities. Any updates regarding transport services will be communicated as they become available.

We will keep you informed of any further updates as they are received from the authorities. We truly appreciate your understanding, trust, and continued cooperation as we work together to ensure the safety of our students and the wider school community.

Thank you for your continued support.

SAFEGUARDING TIPS:

Teenagers especially are finding their way in the world; trying to work out how they fit in. It's important to keep lines of communication open, to support and encourage teenage people and learn to recognise when they need help.

Teen Safeguarding

Teenage people need your love and attention and their own space. Spend some time with them at least once a week. This could be watching a video or TV programme, going shopping, joining in sports activities, talking about school and studies or sharing a meal with just the two of you.

Young people at risk of suicide, as parents, we have the challenge of making sure it doesn't happen to our children. Probably the best thing we can do is do our best - right from the start, by:

- Following some of the advice from this and other parenting resources
- learning about parenting and children
- listening and talking to our children
- valuing their contribution to our families
